## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18 and 23-26 drawn to a method and kit for detecting an analyte A in a sample, classified in class 435, subclass 4.
  - II. Claims 19-22 and 27-31 are, drawn to a method of detecting an analyte A in a sample, classified in class 436, subclass 518.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions has different effect. The method of Group II is different from the method of Group I in that Group II utilizes different reagents. The binding partner R3 requires different and additional binding components of X and Y, with Y being labeled with L2. Therefore, the binding relationship of R3 is different in Group I versus Group II, making both methods patentably distinct one from the other.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Please note that the classifications in the restriction are illustrative only and do not represent all the classes and subclasses which must be

searched for each invention; nor is the search limited to issued US patents, but rather include foreign patents and applications as well as literature searches.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
